PIR MOTION SENSOR

Adjusted Time
Dial Knob

Day Time
Or Night Time

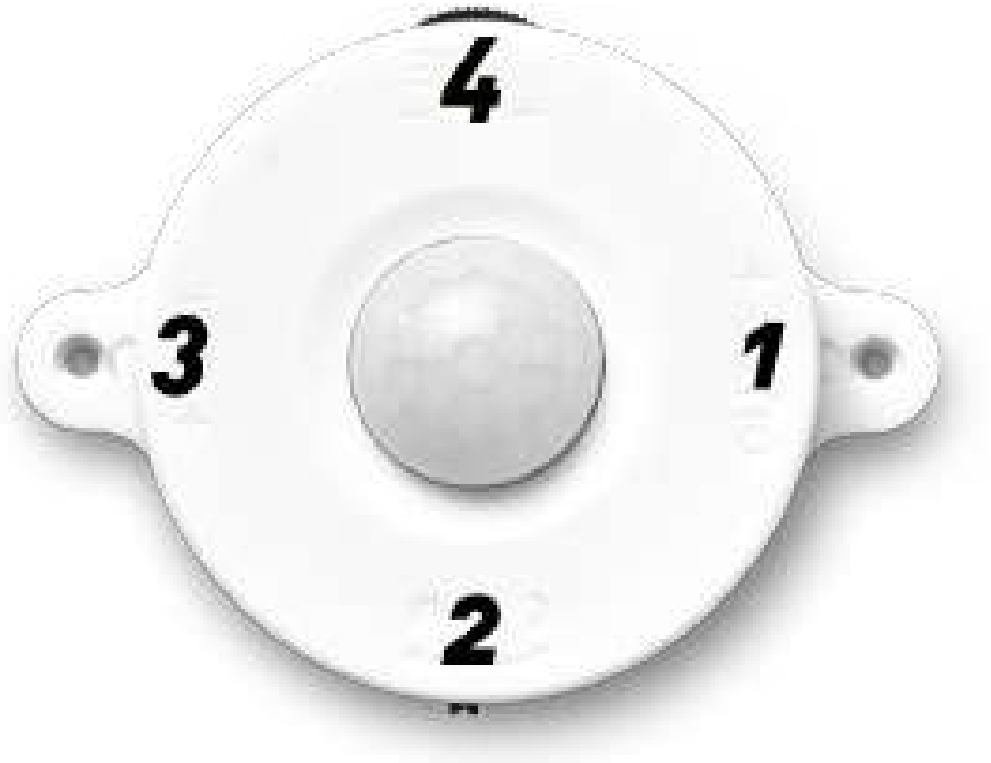

PIR Sensor

Input DC12-24V

Output DC12-24V

1. Output DC12-24V Led Strip with male DC connector
2. Changeable model : Day time or Night time. If you choose daytime, the PIR sensor will work at day time and night time. If you choose night time, the PIR sensor will only work at night time.
3. Input DC12V-24V power supply with male DC connector
4. Adjusted time dial knob, which can adjust time from 15 seconds to 300 seconds. If you adjust it to 15 seconds, it means when you go through the PIR sensor, the light will be on and keep 15 seconds, then the light will be off.
